

Lithionics Battery

## What is the NeverDie Feature?

- No more dead batteries! No more jump starting or flat bedding vehicles with a dead battery.
  - NeverDie Battery Management System (BMS) provides:
    - Protection against over charging and over discharging
    - Accidental short circuit
    - Cell-balancing
    - Temperature extremes
    - The option for state-of-charge monitoring (SOC gauge)
    - The option for remote telemetry
  - Lithionics Battery has patented electronics that can custom program your battery for these features:

1. Low-Voltage Cut-off - Use the power then, put your battery in sleep mode. NeverDie pushbutton/wireless remotw wakes up the battery!

2. Engine Start Batteries - Residual cranking power eliminates the need to jump start your vehicle.

3. RV House Batteries - Dormant vehicles can sit for long periods of time and your battery will still be ready to go when you are!
