

What is the State-of-Charge Meter?

- It is a tool either built to the internal lid of a battery, or built in an external case with a cable extension.
- This tool measure the percent of charge in your battery (actual percent of battery).
- The digital read-out also measures diferent values such as:
 - Fuel percentage left
 - Live amperage charge/discharge
 - Live wattage charge/discharge
 - Graphical fuel gauge
 - Battery pack voltage
 - Battery pack temperature
