

NEVERDIE[®] LITHIUM

Our NeverDie[®] advanced battery and energy systems are designed to offer real and measurable savings when replacing common battery chemistries. These cost savings will be proven in various forms such as...

- ✓ Weight savings that permit other systems to be cost-reduced
- ✓ Electricity savings resulting from our superior re-charging efficiencies
- ✓ Increased life expectancy in the host device resulting from our superior voltage stability
- ✓ Battery life expectancies that are at least double that of the technology we replace
- ✓ Advanced battery solutions, ROHS-compliant, that improve the 'Quality of Life' via GREEN initiative fulfillment, reductions in the Carbon Footprint, and enable the replacement of combustion-engine devices
